Express the level using a string, with 9 characters in each row. Each row has its own code, for example, "315" means there are 3 blocks, followed by 1 empty space, and then 5 blocks. Use 0 for empty space and 1 for a block. If a row starts with 0, like "027," it means there are 2 empty spaces followed by 7 blocks, i.e., "001111111."Codes for each row are separated by spaces. If a blank row is not the last ones, it also needs to be represented by a space

Example level: "315 2232 414 41112" shows the level on the above image.

A maximum of 8 rows exist
